SW SmartWorker

Every screen, before and after

All 30 screens of the app on a phone: the original on the left, what is live now on the right

11 November 2026 · after pull requests 23 and 24 · same test data on both sides

How to read it

- **Before** is the app as it was when the audit started.
- **After** is the app now, with the audit's fixes and the other session's features (PF/ESI, minimum wage, backup, SMS).
- Each picture shows the top of the screen at a 390px-wide phone. Long screens are cut at about two and a half phone-heights.
- The names and numbers are test data, not your real workers.

Changes you will see on almost every screen

- Bottom bar: five tabs with Scan in the centre, instead of six.
- Dates the Indian way (Wed, 11 Nov 2026).
- Nothing runs off the side at small phones or the largest text size.

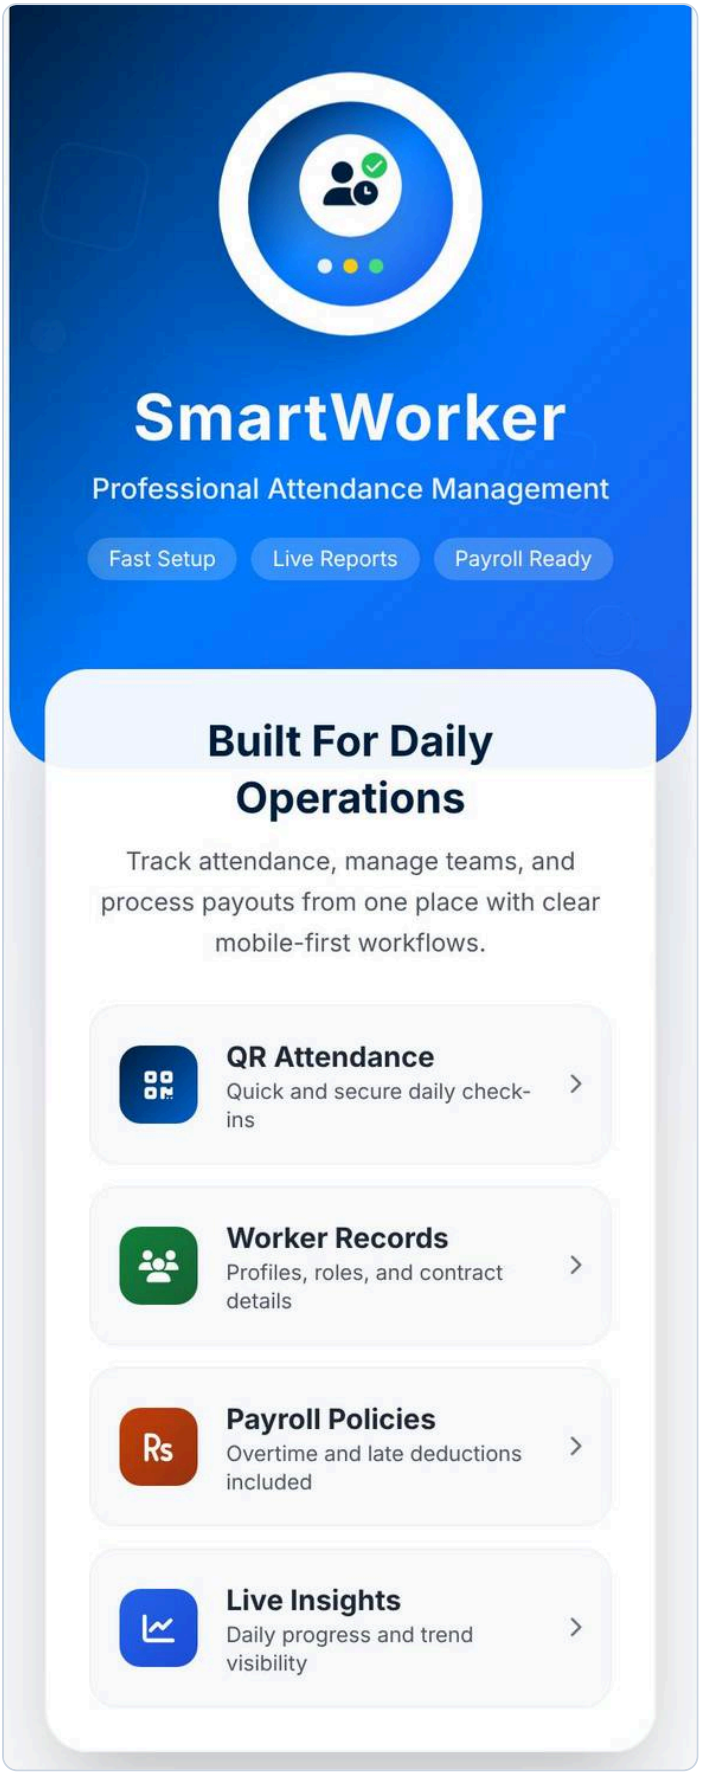

The PDFs

Every PDF the app makes is in the `pdfs` folder beside this file: payslip (Save PDF and Print), ID card and worker report, each in English and Hindi.
