SW **SmartWorker**

PDF corrections

Every PDF the app makes — payslip, ID card, worker report — checked page by page, in English and Hindi, and corrected

10 November 2026 · branch `claude/keen-curie-wr54kr` · not yet live

The three documents

PDF	How it is made	Result
Payslip — Save PDF / Share	A picture of the payslip, cut into A4 pages at safe places	3 pages, ~480 KB, ₹ and Hindi always right
Payslip — Print / Save as PDF	The page's own print layout	2 pages, ~230 KB, real searchable text
ID card — PDF / PNG / Share	A picture of the card on A4	1 page, ~200 KB
Worker report — Print / Save as PDF	The page's own print layout	2 pages, real searchable text

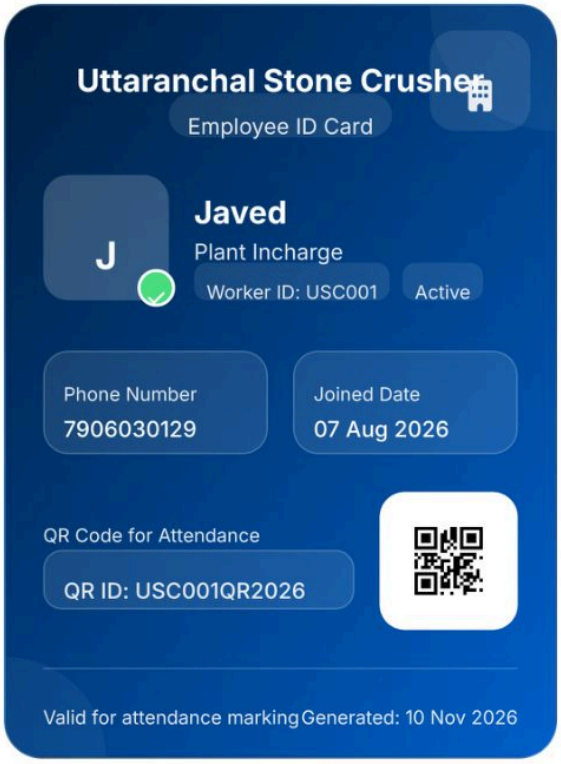

What was wrong, and what was done

#	Problem	Correction
1	**Print did nothing inside the Android app.** The worker report could not be printed or saved on the phone at all.	Print now opens Android's own print screen, which also has **Save as PDF** (real text). Needs a phone test.
2	Every line of text in the picture PDFs was drawn a few pixels low: ID card text under its own labels, the payslip's colour key cut in half at a page break.	Fixed at the cause (html2canvas's text measurement); text now sits where it does on screen.
3	Payslip said **"Not Saved"** — app jargon — on a document a worker keeps.	**DRAFT** badge, a notice ("figures may still change") and a faint watermark until payroll is generated.
4	Payslip printed the salary explanation **twice**.	Printed once.
5	ID card: company name ran under the corner badge; footer lines ran together.	Laid out clear of each other.
6	Hindi dates used cut-off months: "07 अग 2026", "10 नव 2026".	Full months everywhere: "07 अगस्त 2026".
7	Two workers with the same name overwrote each other's files.	Worker ID in every file name: `Payslip_USC001_Javed_Nov-2026.pdf`, `ID_Card_USC001_Javed.pdf`.
8	PDFs had no title.	Title and author set (shown in file managers and PDF viewers).
9	ID card Share did not work inside the app.	Same Share route as the payslip.

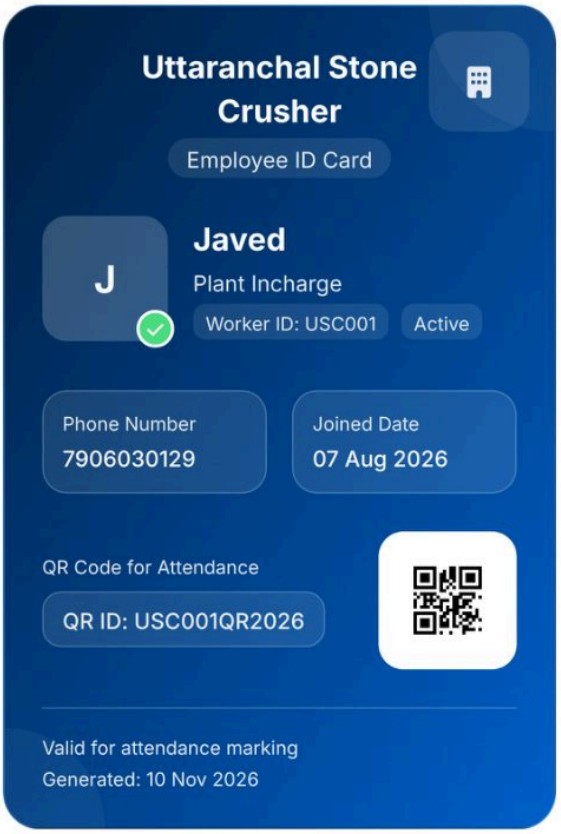

Kept on purpose: the picture payslip stays at 3 pages so its smallest text is 9 pt, the legibility floor (2 pages would mean 6.7 pt). For a compact, searchable payslip use Print → Save as PDF (page 6).

ID card

Before: labels drawn under their pills, the name under the badge, the footer run together. After: all in place, in both languages.

Before English

After English

ID card — Hindi

Hindi months in full: "07 अगस्त 2026", "10 नवंबर 2026".

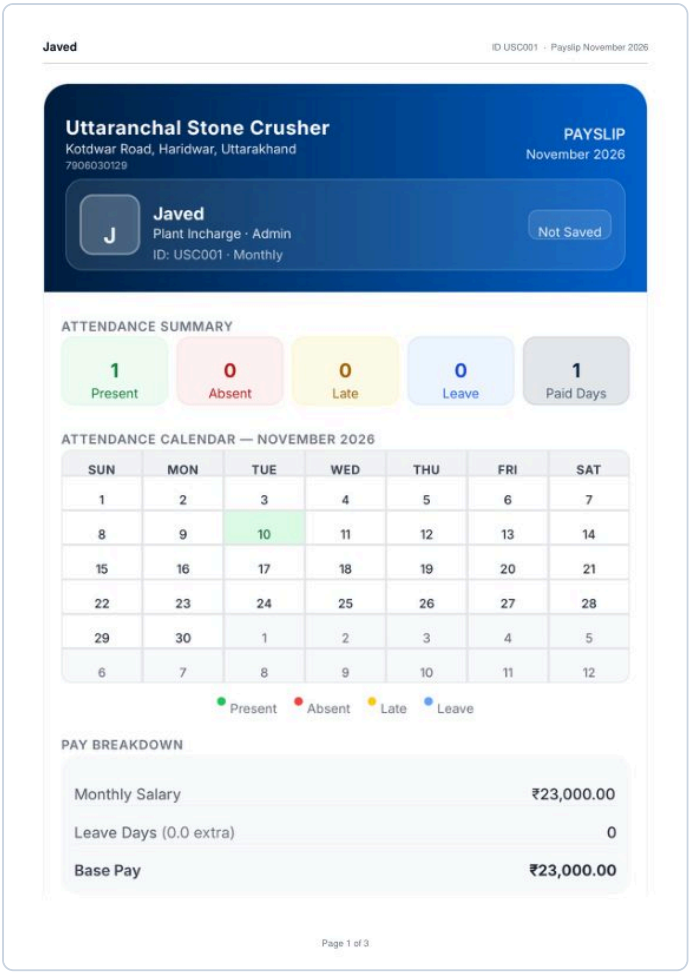

Before Hindi: "07 अग 2026"

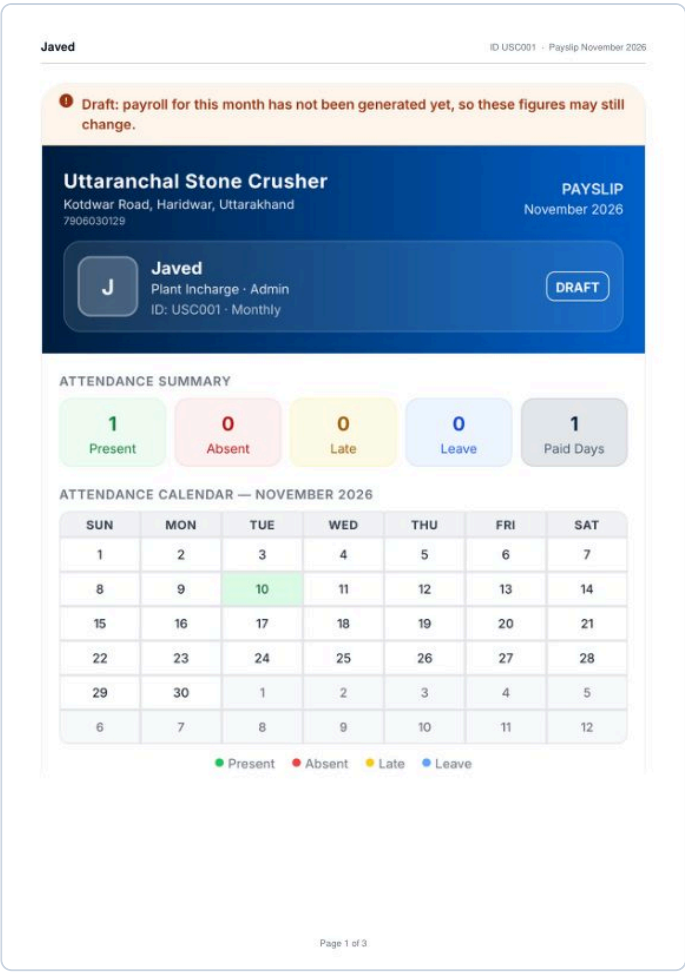

After Hindi: "07 अगस्त 2026"

Payslip — page 1

Before: "Not Saved" on the slip, and the colour key under the calendar cut by the page edge. After: a clear Draft notice and badge; the key whole.

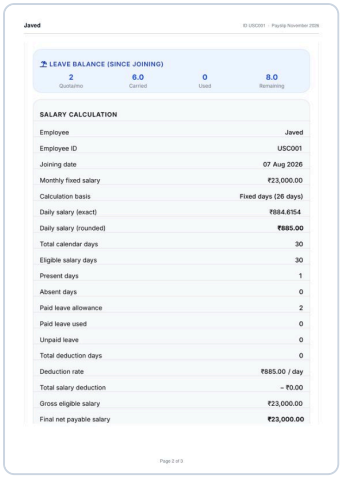

Before Page 1

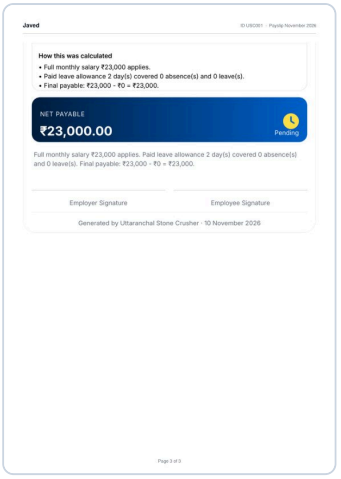

After Page 1

Payslip — pages 2 and 3

After: a faint DRAFT watermark behind the figures until payroll is generated, and the explanation printed once (before, it appeared again under the net pay).

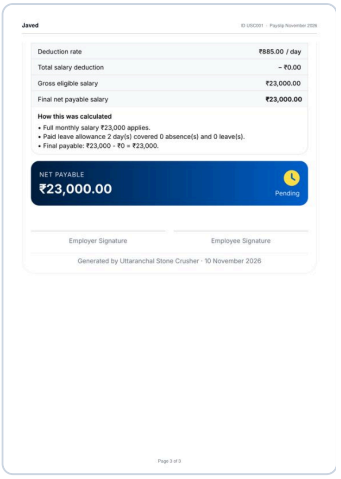

Before Page 2

Before Page 3: explanation twice

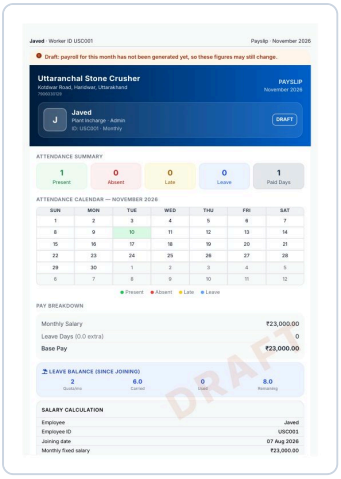

After Page 2, watermark

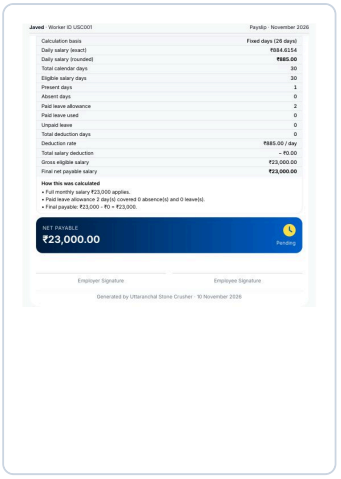

After Page 3, once

Print → Save as PDF

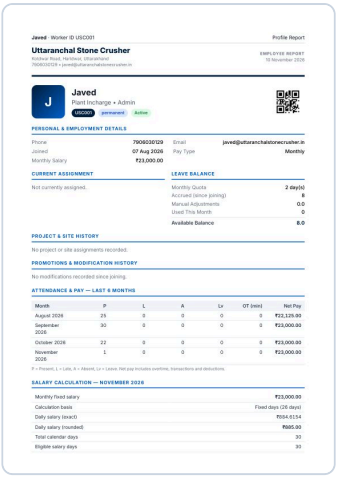

The compact, searchable versions. In a browser, Print offers Save as PDF; inside the Android app it now does too. The worker report was already correct and is unchanged.

After Payslip p1

After Payslip p2

Unchanged Worker report p1

Unchanged Worker report p2
